Known Issues

Error message	Example	Solution
Strange behavior on TMMi level 2 and 3, values seems to be copied	When first downloading the tool, and using the tool after initial download, it seems that the tool act strange by copying values in the questionnaires answers on TMMI Level 2 and TMMi level 3. There is no risk that values are overwritten etc. It looks like a glitch in Excel.	Close down the tool and reopen it solves the problem.
